Summary

Full stack developer with experience of designing, developing, and deploying web applications using Laravel and Nuxt Js as well as Spring Boot and Angular. Adept at collaborating with cross-functional teams, employing Scrum methodology, and delivering high-quality software solutions.

Experiences

IT Manager - 09/2018 to 09/2019

Tunisian Academics Association, Darmstadt

- Maintaining IT infrastructure and Website.
- Providing workshops and courses.

Fullstack Developer (Bachelor internship) - 09/2019 to 04/2020

General Logistics Systems, Eschborn

- Built a web application, based on Spring Boot and Angular within a team of six.
- Using Agile methodology to manage project timelines, participate in daily stand-ups, sprint planning, and retrospectives.
- Carry out quality assurance tests (unit / integration tests).

Fullstack Developer – 05/2022 to 02/2023

DineHood, dinehood.com

- Designed and developed a full automated ordering system for restaurants using Laravel and Nuxt Js
- Implemented real-time updates using WebSocket, enabling users to track their orders in a dynamic environment.
- Implemented continuous integration and deployment (CI/CD) pipelines, enhancing the development and deployment workflow.

Fullstack Developer – 01/2023 to 04/2023

Astos, astos.shop

- Designed and developed a full-stack e-commerce platform using Laravel and Nuxt Js, allowing users to browse products, add items to the cart, and complete orders.

Education

Bachelor of Science: **Informatik** - 2022

Technical University of Darmstadt, DE
